## FIVE YEAR STRATEGIC PLAN CHANGES SAFETY IN QLD

Queensland Workplace Health and Safety have recently implemented a new Five Year Strategic Plan. The following four areas will be the focus points of this plan;

1. Embracing innovation and technology designed to help business identify and respond to existing, emerging and evolving work health and safety challenges
2. Designing healthy and safe work by considering higher order risk controls to predict and design out physical and psychological tasks in the workplace
3. Fostering a culture of health and safety through instilling leadership, attitudes and behaviour in QLD workplaces and communities that positively impact processes, experiences and outcomes.
4. Regulating effectively through business compliance, regular safety inspections and implementation of laws.
